## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

### REASONS FOR ALLOWANCE

The final Office action mailed 09/15/2010 is vacated.

The following is an examiner's statement of reasons for allowance: The rejections made in the previous Office action mailed 09/15/2010 are vacated for the reasons discussed in the Interview Summary mailed 10/29/2010. The closest prior art is Leamon (US 7,323,305), which only qualifies as prior art for what was disclosed in provisional application 60/465,071. The subject matter disclosed in the '071 application is limited to ligating adaptors to fragmented genomic DNA and using a primer to the adaptor to carry out sequencing reactions. A primer to the adaptor would not be capable of allele-specific sequencing. Moreover, Leamon's '071 provisional did not teach or suggest single nucleotide extension. Leamon's sequencing templates (in the '071 provisional) were generated by fragmenting genomic DNA and ligating adaptors. Hence, Leamon's method resulted in a random assortment of unknown, uncharacterized sequencing templates. While one *could have* used the primer to the adaptor to carry out a single-nucleotide extension (e.g. using a primer such that the first nucleotide added would be complementary to the first nucleotide of the original fragment of genomic DNA), there would have been no reason to do this since, in Leamon's method, the fragments were completely random. A single-nucleotide incorporation assay would only have been useful in a case where a *defined* nucleic acid template was being analyzed (i.e. determining a single-nucleotide polymorphism of a specific position in a specific template). Performing single-nucleotide extension on a

completely random, unknown and uncharacterized fragment of nucleic acid would have provided no useful information.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
